Open Postdoctoral positions

The AST research group at Universitat Rovira i Virgili is looking for enthusiastic and talented researchers to join us in a postdoctoral position in the area of cloud computing under sponsorship of H2020 IOSTACK project (iostack.eu). The research will be carried out in collaboration several highly reputed research groups including the Distributed Systems Group at Eurecom, France.

Particular research themes are software defined storage, and big data management strategies, data-centric middleware, and software defined protection of data in cloud environments.

The offer consists in a 1-2 years postdoctoral position with an annual salary of 30K€.

Requirements:

- Applicants must have a Ph.D in Computer Science with strong background in distributed systems.
- Candidates should speak English and be able to write scientific articles. Speaking Spanish or Catalan is not mandatory.

Contact Info: pedro.garcia@urv.cat

Please provide us with the following documents:

- Full CV
- Ph.D. thesis (a draft or your best paper are also accepted) per e-mail to: [pedro.garcia\[at\]urv\[dot\]cat](mailto:pedro.garcia@urv.cat) (use "AST Postdoc recruiting 2016" as a subject) before September 2016

Please, bear in mind that those admission requests that do not follow this advice may be automatically discarded.
