We are happy to announce that we provide a **freely available dataset to the research community**. The dataset consists of an active measurement of three major Personal Clouds (Box, DropBox and SugarSync) during more than two months. All the measurement details as well as the files can be found at: http://ast-deim.urv.cat/trac/pc_measurement/. You may also find interesting the analysis entitled "[Actively Measuring Personal Cloud Storage](#)" published at IEEE Cloud'13. Enjoy!! :)
